Summary

Mobile & Full Stack Developer with 4+ years of experience building production web and mobile applications. Experienced with React Native, Flutter, Kotlin, Compose, React, and TypeScript, with a focus on mobile development, maintainable code, and user experience. Currently deepening my expertise in Flutter, mobile architecture, and backend development.

Experience

Coppel Arg, Full Stack Developer

Aug 2025 – present

- Led end-to-end business features across frontend and backend services, integrating REST APIs, VTEX, internal platforms, and third-party systems for a high-traffic e-commerce platform.
- Led the technical implementation of the online credit application flow, including biometric identity validation and the complete frontend experience.
- Led the continuous evolution of checkout, covering cart management, payment, shipping, and order confirmation.
- Refactored and modularized legacy monolithic applications, improving maintainability, scalability, and development velocity.
- Contributed to software architecture, BFFs, microservices, event-driven communication, Clean Architecture, CI/CD, code reviews, and technical planning.

Lightvessel, Mobile Developer

Mar 2023 – Aug 2025

- Developed and maintained production mobile applications using React Native, Flutter, and Compose for products reaching more than 20 million users worldwide.
- Built end-to-end mobile features integrating REST APIs, Firebase, and local storage.
- Improved performance, stability, and maintainability by resolving production issues, optimizing critical flows, and refactoring legacy code.
- Contributed to software architecture, code reviews, Agile ceremonies, and engineering best practices across multiple projects.

Lightvessel, UX/UI Designer

Jan 2022 – Mar 2023

- Designed user-centered mobile interfaces and flows for Android and iOS, collaborating with developers on implementation and reusable design systems.

Universidad Nacional de Quilmes, Programming Instructor

Feb 2025 – present

- Designed and evolved the curriculum for a university-level Diploma in Game Development, covering programming, software engineering, and game development.
- Taught programming with Godot and C#, developed project-based materials, and mentored students through complete software projects.

Education

Higher Technician in Computer Programming

Mar 2022 – Nov 2024

Universidad Tecnológica Nacional

Professional Certificate in Front End Specialist

Feb 2025 – Feb 2026

Digital House

Skills

Mobile: Flutter, Dart, Kotlin, Jetpack Compose, React Native

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3

Backend & APIs: REST APIs, GraphQL, Node.js, API Integration, Authentication, Spring Boot

Data & Services: Firebase, MySQL, MongoDB, SQLite, SQL Server, Local Storage

Architecture & Engineering: Software Architecture, Clean Architecture, Microservices, BFF, Event-Driven Architecture, Code Review, Refactoring, Performance Optimization, Debugging

Cloud & DevOps: AWS, Docker, GitHub Actions, CI/CD

Professional Competencies: Technical Leadership, Cross-functional Collaboration, Technical Mentoring, Problem Solving, Technical Planning

Languages: Spanish (Native), English (B2)
